RADICALS AND "MOONSHINERS" IN FOR MOST TROUBLE

Washington, Dec. 8.—Radical agitaars and "moonshiners" have given e department of justice the greatst trouble during the past year, acording to the annual report of the ctorney general made public today. Although there have been but a few ictments against radical agitators, e report said, there has been a great

esult from the activities of the de-extment against these persons. Limitations of the law have made necessary for the department to er their work upon those who are

liens with the object of deportation view.
"Already this policy has shown re-

"In view of this, the Ohio meeting, scheduled for Monday will not be held. It is reassuring to the country that the master hand of President Wilon is again in action."

Intimate friends of Governor Cox oppressed the belief that if the coal Frike is settled as a result of the reported agreement reached at Washington Saturday between government officials and acting President Lewis and Secretary-Treasurer Green, of the United Mine Workers of America, much credit will be due the present governor of Ohio.

These friends of Gov. Cox are inclined to believe that the headway which the governor was making in his conferences here last week, looking to a separate wage agreement which would end the coal strike in the Ohio mines had much to do with whatever agreement was reached at Washing-

MOBS TERRORIZE CITY OF MANTAN KILLING EIGHT AND WOUNDING TWO SCORE; ATTACK GARRISON

Rome, Dec. 8. Mobs have been terrorizing the city of Mantua. Eight persons were killed and 40 or 50 wounded as a result of the rioting.

The rioters attacked the small garrison, cut telegraph and telephone communications, stopped railway traffic, raided arms shops, freeing all sorts of criminals, and held the police and soldiers at bay until fresh troops and carbineers arrived with machine guns and occupied the city militarily. The troops finally established order.

The disorders were begun by 500 strikers, who speedily were joined by the lawless element, under the direction of extremists. The crowds stormed the military barracks and fired on the garrison. The soldiers discouraged the attack by firing into the air. At the suggestion of some of the extremist leaders the mob moved on the railway station and seized the restaurant, where they feasted and drank wine. As Warren started to lift up an escritoire that had been upset and rifled. its back came loose and from some secret compartment several let-

ers fell out. He had missed them when he had discovered those which had caused him so much misery and distress. As he read one of them a great light came into his mind. As he completed the perusal of the last one his face bore a startling radiance. He knelt before the picture of dead and cherished Myrtle and brokenly uttered the words: "My angel-forgive! forgive! Oh, how could I ever doubt that your love was all mine, mine only!"

For the letters, written by Alton Dover after her marriage, were full of gratitude to Myrtle, who had been a true friend to him and to the girl he later wedded, and all her interest in Dover had been to help him in winning the love of a girl whose parents had opposed the match.

And, with the dark shadows of suspicions and distrust banished from his morbid mind, Philip Warren thought first of her sister, whom he had so cruelly neglected. He visited the Vances at once, but never told them of the cause of his isolation, neither did they even know that an act of kindness to a hungry tramp, in a strangely, devious way, had brought o them the renewed beneficence and friendship of the man who had once out of his life.

The Sex of an Egg.

According to the Paris Academy of Science the sex of eggs laid by purebred fowls may be determined by weight and size. A test is to hold the egg in the left hand in the sun or close to an electric or gas light. Shade the end of the egg with the right hand, and look for the air space or "setting" (a dark, watery spot larger than a tencent piece); if this is found on the top it is a male, but if lower down the side it is a female egg.

Snow and Fireflies,

The oriental is always and ever pieturesque. The student of the East does not "burn the midnight oil." He works by snow and fireflies. There is an ancient legend about a Chinese student who was too poor to buy oil. So in the summer months he studied all night by the light of fireflies caught and imprisoned in a paper lantern, and in the winter by the reflection of the snow.-Gertrude Emerson in World

THE HALF OF HENRY C. FRICK'S MONEY.

We had a recent article on the over them. spectacular career of Henry C. Frick, the very rich coke and steel magnate, who died in New York City, a week ago. In the moral, at the end of the article, we intimated that business, the telling of other people other day, how they ought to spend their money. He died worth two hundred millions of dollars, and had spent between twenty and twenty-five millions of dollars for world-noted paintings and the greatest discretion.

You know our fad is, that if we dier's Orphan's Home, and we expect see the pictures of that execution. it was the thought of what a wonderful work in this line Henry C. Frick could have done, rather than criticism of his art collection that was intended. We doubt not that his pictures and statuary will give mental pleasure to millions of people, as it is intimated that the collection will be given to the public.

But now see what a human benefactor Mr. Frick might have been, had he chosen to use say one-half of his great wealth in endowing Orphan Homes. That would be, say one hundred millions of dollars. We leave the reader to calculate the annual interest ircome on this amount and then divide this between whatever number of Orphans Homes it would maintain at about two hundred thousand dollars per year for each, which we believe is about the cost of our Orphan's Home.

And then think of the number of poor wretched children from the there any work in the world of more benefit to the recipients, and to the world, than such a deed? And have we not constantly before us the inestimable benefits of our Home?

Orphan's Homes have a double advantage. They eliminate the children from evil surroundings where they are liable to grow up criminals and be an expense to the tax payers, instead of which they come out respectable citizens and often become noted characters of the world. Who would not like to be instrumental in helping forward a blessed cause like

We are not speaking of the orphans of Dickens' day, where they used to farm them out to the lowest bidder and where they were often mistreated, but of the orphans of our own blessed country where they are treated like human beings, well fed and educated, as in our own Greene County Orphan's Home.

God sends children for another purpose than merely to keep up the race. He sends them to enlarge our hearts; to make us unselfish and full of kindly sympathy and affection. And We are to be God's administrators of this trust. The interests of childhood and youth is the way to make mankind worth-while. Blessed is the man that rightly directs the pathway

Don't burn good fuel in a poor stove

Its a useless waste of good fuel and a needless extravagance to try to burn it in a poor stove. It is absolutely wrong to expect good food to supply energy, vitality, health and happiness if your stomach won't absorb and assimilate it. YANKS MAKING GOOD ! FRANCE

Have Not "Americanized" Country, but Meet Success in Business.

SOME HAVE BECOME WEALTHY

Several Thousand Discharged American Soldiers Remained in France to Try Their Fortunes-News paper Men Land on Feet.

Paris.-Several thousand discharged American soldiers who remained in France to try their fortunes are faring as must fare all pioneers. A few have become reasonably wealthy; some are "reporting progress;" the majority, however, are flying rather lower than they were when they set out to "Americanize France."

Nearly 9,000 American expeditionary force men were released here, and it is estimated a fourth of these have settled down to work here. The others are visiting, sightseeing or have gone home after a discouraging look at business prospects.

Several hundred found employment ith large concerns, chiefly American firms preparing to do business in the devastated regions. Another group took various small places to pay their way while studying. The majority. was said, started to make good

capitalizing American methods. Bu. most of them agree that easy money is not one of the natural resources of France, but a few have proved that it is. A negro made 125,000 francs (normal value, \$25,000) buying and selling army and navy supplies a: Brest. His case is vouched for by a well-known American commercial ex-

Chicago Press Club Driver Wins. The most striking success reported is that of "the fox-trot kings of Paris," as they term themselves, Gerald Kiley, who drove the Chicago Press club ambulance, and Harold Fitch of St. Paul, who was at the wheel of one of Mrs. W. K. Vanderbilt's ambulances and later went to the front. Kiley and Fitch, the former said, got their start over here when the wife of an American banker "pressed 500 francs (about \$100) on us" when they played in a three-man jazz band at a dance she gave. They organized a Wilson welcome ball at a leading hotel when the president arrived in Paris and net-A friend told me about Dreco, and ted more than 10,000 francs on the afthe good it was doing, so I lost no fair. This success, they said, they time in getting a bottle. My relief often duplicated at "the Dixie club"

Knowing that good things must not be overworked, the men took over the ice cream making equipment of the Y. M. C. A., which has a capacity of a thousand gallons an hour, and late in October began wholesaling "Dixie"

Some of the most interesting of the American business experiences here are those of men who married French girls. Three of these are farming east of Paris, "making more money than they ever thought possible in the United States," their business adviser said. One man married into a dairy shop. Another returned to his bles, nine times out of ten originate trade of tailoring in the same way. from stomach trouble. These are Scores of American boys are in business with their French fathers-in-law.

Introduce Rebuilt Typewriters.

Rebuilt typewriters, familiar to Americans, have been introduced to the French by Lieut. J. L. McCann of Tuscaloosa, Ala., and George E. Howard of Pasadena, Cal. Their difficulty is too much business. Isadore Court, who was a paperhanger, boldly set himself up in the decorating business in a fashionable suburb. Lieut. S. L. Tyler of Memphis, Tenn., became a merchandise broker. Harry L. Drucker, photographer, returned to his trade.

One man who wanted to bring in carloads of automobiles and bicycle tires turned defeat into success by opening a tire sale and repair shop. Another one with the same idea is awaiting arrival of a real steam vulcanizing plant to give Paris a taste of fast work. He said virtually all tube repairs here now are made with cement patches instead of vulcanizing, and take a week instead of an hour.

Newspaper men seem to have landed on their feet most quickly. Nearly all of those who stayed are developing some "idea" outside of office hours. Ideas for wealth may result in the establishment of a chain of hotels and

restaurants along the battle-front towns. One young man who missed the American "shine" is negotiating a lease for a shoe-shining parlor.

"Writ Sarkastic."

A dog should have a separate bed with a change of sheets every night."

WARNS THAT DANGER LIES IN RAW PORK

Government Urges That Care Be Taken to See Meat Is Prop-- erly Cooked.

(Prepared by the United States Depart-ment of Agriculture.)

At this season there is especial danger of illness following the eating of pork that is raw or only partially cooked. Of course, most Americans do not knowingly consume uncooked pork, although it is eaten not infrequently either as raw ham or in sausages that have been insufficiently cook-At hog-killing time particularly there are many home-made meat prodacts prepared on the farm, and consequently special care should be taken to make sure that pork, before it is

eaten, is sufficiently cooked.

The disease known as trichinosis, which may result from eating raw or imperfectly cooked pork, is caused by microscopic worms known as trichinae. These parasites in years past have been found to be present in one out of 71 hogs, and if the presence of dead trichinae and trichinalike bodies is included in the count, an average of one out of every 39 hogs has been found affected. Unlike many other infectious diseases, the severity of the attack of trichinosis depends upon the number of parasites swallowed. Large quantities of slightly infected pork must be eaten in order to produce bad effects; but, on the other hand, severe liness may be caused by eating small amounts of pork that is heavily in-

Don't Let Prices Deter You!!

TT WAS thirteen years after the close of the Civil War before prices on Lumber got L back to normal. History has the habit of repeating itself and present conditions would seem to justify the prediction that it is going to be fully that long or longer before lumber costs recede to the pre-war level.

DOES this mean that the price bugaboo is to hold progressive America in leash and stagnate activity over this long period along the line which most of all contributes to individual comfort and happiness?

OLD analysis of building material costs indicates that such, while high, logically should not deter one from carrying out any reasonable building program. Lumber as compared with 1915 has increased in cost by 84%. All off-or commodities on an as compared agency of the price of farm products has increased by 116%. Realizing then in this connection that there has been a material advance in the earning power of the average individual and a tremendous advance in the price of the product of labor, it is plain that the high cost of building material, especially as applied to lumber is more of a hoax than a fact.

WITH a glorious future before us and with pressing necessity for homes and other building development all about us; with the all but building development all about us; with the all but absolute certainty that building costs are not going to decrease for years to come, it is the height of folly to

THE wise man will build NOW, employing extra effort and stricter economy to bridge over the present emergency. Build with a hopeful eye on the future which will bring no disappointment to those who ACT—to those who, correctly analyzing present conditions, do not allow the high price bugaboo to deter them.

Saving Coal Saves Money

And Helps The Nation

There's a wealth of proof to show that your home may be thoroughly comfortable at a third or a half less fuel than you have been using. The Caloric Pipeless Furnace is a remarkable fuel conserver. Many say it saves half. Here is just one sample letter taken at random out of thousands which the manufacturers receive from pleased Caloric owners:

"I am heating very comfortably seven rooms and not asing any more fuel than I did with a double heater, heating only two rooms, -S, P. SEIFERT,"

Over fifty thousand homes, many of them in this state, have found this furnace the economical, common-sense method of keeping comfertable. They bought on a guarantee of real fuel saving and perfect satisfaction, and the Caloric made good. One register delivers all the heat from the fuel directly into your living rooms and draws out the cold air, insuring an abundance of balmy, moist warmth right where you want it. The cellar is just right for the storage of perishable products.

The Caloric can be installed in a day. It is a triumph of engineering skill that embodies many patented features which have made it the leader and which are not found in imitations. Come in and see this wonderful furnace. We will tell you frankly whether it is adapted to your home. If we say it is, we will give you our personal guarantee that it will make good or we will take it out. Come in and talk it over.

15 EGGS A DAY FROM

Mr. Dunl's Hens Increased Every Day. Plan Is Easily Tried.

"We have 23 chickens and hadn't had an egg all winter. In five days after feeding Don Sung, we got four to five eggs a day; in three weeks, we were getting 10 to 12 eggs a day; in five weeks we got 15 to 19 eggs a day."—John Duni, Box 102, Cherry Valley, Pa. Mr. Duni started giving his hens Don Sung in January, in zero weather. He now keeps his hens busy in cold weather, when hens usually stop laying. A trial costs nothing. Here's our offer: Give your hens Don Sung and watch results for one month. If you don't find that it pays for itself and pays you a good profit besides, simply tell us and your money will be promptly refunded.

Don Sung (Chinese for egg-laying) works directly on the egg-kying) works directly on the egg-kying organs, and is also a splendid tonic. It is easily given in the feed, improves the hen's health, makes her stronger and more active in any weather, and starts

One picture which draws big crowds is "The Woman in Yellow" by William MacGregor Paxton, and much admiration is accorded to John Christen Jehansen's "Portrait of an Old Lady." This artist was recently in France making a study of General Joffre for the National academy. Douglas Volk has an attractive portrait picture, "Marion of Hewn Oaks," and has been engaged on a painting of King Albert of Belgium, which is intended for the National Academy of Arts.

Returning soldiers were attracted by a canvas of Gifford Beal, "The Hour of Peace," depicting decorations at Thirty-fourth street and Fifth avenue, New York. Aches and Pains of Rheumatism Sometimes Almost Unbearable.

There are weather conditions that make rheumatism worse. They are not the same in the cases of all persons. Some victims of this disease suffer more in dry warm weather than in moist cold weather, but all suffer more or less all the time. The cause of rheumatism is an ex-

cess of uric acid in the blood, affecting the muscles and joints. Hence the blood must have attention for permanent results in the treatment of this disease.

TEN FORCEFUL FACTS CONCERNING THE Proposed Bond Issue

FOR THE

Greene County Memorial Hospital

DO YOU KNOW That an adequate hospital in Greene County would serve OVER 30,000 PEOPLE.

DO YOU KNOW That it will be made a SELF-SUPPORTING INSTITUTION.

That it would serve the POOR WHO ARE UNABLE TO PAY as well as the rich who can pay.

DO YOU KNOW That there are people located in distant parts of this county more than THIRTY MILES AWAY FROM A MODERN HOSPITAL

That there are times in the year it is almost impossible to travel a distance of thirty miles and, in case of serious sickness the lack of a modern institution may mean DEATH OR SERIOUS INJURY TO YOU OR A MEMBER OF YOUR FAMILY.

DO YOU KNOW

That you or some dear friend may be the next person who will need a MODERN INSTITUTION OF THIS KIND.

DO YOU KNOW

That it will enable the physicians of the county to SERVE YOU BEST WHEN YOU NEED IT MOST.

DO YOU KNOW

That if you have sickness in your family and you have a modern hospital available with a room at your disposal the burden of responsibility in CARING FOR THE SICK WOULD BE LIFTED FROM YOUR SHOULDERS.

That it would give an opportunity for Greene County women to educate themselves to be TRAINED NURSES, A PROFESSION GREATLY IN DEMAND.

That there are hundreds of dollars contributed by people in Greene County every year TO HELP MAINTAIN OUTSIDE HOSPITALS.

AS CRISIS PASSES

Opinion Expressed that Ohio's Governor is Due Much Credit if Final Adjustment is Made.

Columbus, O., Dec. 8.—Governor Cox has called off his conference scheduled for today with Ohio opera-

tors and miners officials. "Indications are that the mine controversy will be settled Tuesday on a nation wide basis," declared Governor

"In view of this, the Ohio meeting, scheduled for Monday will not be held. It is reassuring to the country that the master hand of President Wil-

son is again in action." Intimate friends of Governor Cox pressed the belief that if the coal Strike is settled as a result of the reported agreement reached at Washington Saturday between government officials and acting President Lewis and Secretary-Treasurer Green, of the United Mine Workers of America, much credit will be due the present governor of Ohio.

These friends of Gov. Cox are inclined to believe that the headway which the governor was making in his conferences here last week, looking to a separate wage agreement which would end the coal strike in the Ohio mines had much to do with whatever agreement was reached at Washing-

Rome. Dec. 8.-Mobs have been terrorizing the city of Mantua. Eight persons were killed and 40 or 50

wounded as a result of the rioting.

The rioters attacked the small gar-

rison, cut telegraph and telephone communications, stopped railway traffic. raided arms shops, freeing all sorts of criminals, and held the police and soldiers at bay until fresh troops and carbineers arrived with machine guns and occupied the city militarily. The troops finally established order. The disorders were begun by 500 strikers, who speedily were joined by the lawless element, under the direction of extremists. The crowds stormed the military barracks and fired on the garrison. The soldiers discouraged the attack by firing into the air. At the suggestion of some of the extremist leaders the mob moved on the railway station and seized the restaurant, where they feasted and drank wine. Those of the rioters uncensed when the men inside poured wine upon the floor of the restaurant

until it flowed into the street. The rails were torn up to prevent trains from entering or leaving the badly wrecked. At the suggestion, to custody. "Let us burn the jails and free the prisoners," the mob moved to the prisons, overcame the guards and ordered the astonished prisoners out, telling them a revolution had come and they were free.

The men released were all being held for common crimes. Those unable to obtain civilian clothes turned their striped uniforms inside out, so as to be nonconspicuous. They were given arms seized from soldiers or taken from the looted arms shops The proprietor of one of the arms

"No, Elita," replied Dudley, with a deep sigh, resting his head wearily on both hands, clasping the heavy cane he carried, a reminder of a crippling fall he had received several weeks previous. "Your brother-in-law gave no heed to my letters, and when I spent my last cent to reach his home he saw me from the window, shut it Mr. Arthur Gilkey is confined to er paid the least attention to me. I am sorry now that we courted this humiliation, believing he would help

> "It is so unlike him," murmured Mrs. Vance sorrowfully. "In the old days when my sister, his wife Myrtle, was alive, he was the soul of friendly interest and generosity."

"What can have so changed him?" "I can't understand, Dudley, but from what I have heard, Mr. Warren has been a perfect recluse since Myrtle died."

"I don't know what we shall do," said Dudley in a broken tone. "It's the little sick ones that trouble me. I was so sure Mr. Warren would help us over this hard place until I am able to get at work again."

his wife. He was of a jealous dispo-12-6 sition, however, and in his somber moods was inclined to look at the dark side of life. He had acted inconceivof Myrtle before their marriage, fancyand after Myrtle died would pass Dover on the street without even looking

> Dover had also married in the meantime, but soon after Myrtle's death Warren discovered several notes indicating that there was some understanding between Dover and herself, for the communications mainly covered appointments for meeting one anwife, but an insane prejudice against Dover was born in his mind, and the dread that he had not had the exclusive love of the wife he adored made of Phillip Warren a wretched misanthrope and hypochondriac. He shut his heart against every friend he had known, including his sister-in-law

The troubled Vance and his wife went over their miseries and prospects in detail, all unconscious that under Sheep, \$4@9 25; the shade of a tree just beyond the open window a stranger was lying upon the grass. As the baby went to sleep the conversation 10 50; cows, \$600; caives, \$18020.

"There isn't much, friend," spoke Vance in his usual kindly way, "but Cattle—Shippers, \$10 50@15; butcher you are welcome to what there is," steers, \$6 50@12 50; heifers, \$6@13; and he set before his visitor a frucalves, \$6@19. gal, but ample meal.

Jim Hardy, roustabout tramp, and at times petty thief, went his way and forgot all about the Vances until two weeks later. His visit, however, was destined to lead to a sequel.

"Just occurred to me, Mart," he said. "a bit of conversation I overheard at Columbus gives me a tip to try our luck here in this town. There's a man named Warren lives all alone and I should judge is a miser with a house full of money. Suppose we get some of it?"

"I'm agreeable," was the prompt response, and when Philip Warren returned that night from a solitary stroll, he found the door forced and his living room bearing evidences of having been thoroughly ransacked. The burglars had not found any money, for he kept that at bank, but they had departed with some silverware which he valued only because it had belonged to his dead wife.

As Warren started to lift up an escritoire that had been upset and rifled. its back came loose and from some secret compartment several let-

ers fell out. He had missed them when he had discovered those which had caused him so much misery and distress. As he read one of them a great light came into his mind. As he completed the perusal of the last one his face bore a startling radiance. He knelt before the picture of dead and cherished Myrtle and brokenly uttered the words: "My angel-forgive! forgive! Oh, how could I ever doubt that your love was all mine, mine only!"

For the letters, written by Alton Dover after her marriage, were full of gratitude to Myrtle, who had been a true friend to him and to the girl he later wedded, and all her interest in Dover had been to help him in winning the love of a girl whose parents had opposed the match.

And, with the dark shadows of suspicions and distrust banished from his morbid mind, Philip Warren thought first of her sister, whom he had so cruelly neglected. He visited the Vances at once, but never told them of the cause of his isolation, neither did they even know that an act of kindness to a hungry tramp, in a strangely, devious way, had brought o them the renewed beneficence and friendship of the man who had once out of his life.

> The Sex of an Egg. According to the Paris Academy of Science the sex of eggs laid by purebred fowls may be determined by weight and size. A test is to hold the egg in the left hand in the sun or close to an electric or gas light. Shade the end of the egg with the right hand, and look for the air space or "setting" (a dark, watery spot larger than a tencent piece); if this is found on the top it is a male, but if lower down the side it is a female egg.

The oriental is always and ever picturesque. The student of the East does not "burn the midnight oil." He works by snow and fireflies. There is an ancient legend about a Chinese student who was too poor to buy oil. So in the summer months he studied all night by the light of fireflies caught and imprisoned in a paper lantern, and in the winter by the reflection of the snow.-Gertrude Emerson in World Outlook.

> How Low Rates Are Secured for Farmers.

"The federal land banks are not permitted to charge any rate of interest except that which the board may prescribe, and the rate of interest which the farmer is required to pay may never exceed one per cent in excess of the rate upon the bonds.

"If they can sell the bonds at three per cent, the farmer under the terms gets the benefit; he gets it at four and in addition to that pays one per ent for amortization, which would nake the cost of the money five per eent, including all of the expenses of the operation of the bank and the one per cent for amortization.

"Now the value, of the loan to the 'armer is very great. Not only is he issured of his credit for thirty-three or thirty-six years, if he wants it, but ie knows that nobody can force the arlier payment of the principal of the oan except upon his own default. On he other hand, if he happens to be prosperous and finds that he has earned mough money to pay the loan before naturity, he is allowed to pay it in full or any part, at any time after five lears.

'EACE DEMANDS WITH GERMANY ARE ABANDONED

Paris, Dec. 8 .- The military measures stipulated in the protocol of the peace treaty to enforce the terms upon Cermany have been almost completely abandoned, it was learned from an authoritative source today

Furthermore, the reparations demanded for the sinking of interned German fleet at Scapa Flow have been modified.

This news came as a complete surprise in view of the tension on Saturday when the allies were reported in press dispatches to be taking military steps to compel Germany to accept the protocol terms. It was reported that the allied note to Germany was couched in terms of such sterness that it almost might be called an ulfima-

French newspapers took the view today that the modifications probably will not attain the object of making it more easy to sign the protocol. On the other hand a large section of the press expressed belief that it might crease German resistance."

THE HALF OF HENRY FRICK'S MONEY.

We had a recent article on the over them. spectacular career of Henry C. Frick, the very rich coke and steel magnate, who died in New York City. a week ago. In the moral, at the He died worth two hundred millions of dollars, and had spent between twenty and twenty-five millions of dollars for world-noted paintings and other art treasures. It goes without the greatest discretion.

You know our fad is, that if we money in duplicating the Ohio Soldier's Orphan's Home, and we expect see the pictures of that execution. it was the thought of what a wonderful work in this line Henry C. Frick could have done, rather than criticism of his art collection that was intended. We doubt not that his pictures and statuary will give mental pleasure to millions of people, as it is intimated that the collection will be

given to the public. But now see what a human benefactor Mr. Frick might have been, had he chosen to use say one-half of his great wealth in endowing Orphan Homes. That would be, say one hundred millions of dollars. We leave the reader to calculate the annual interest ircome on this amount and then divide this between whatever number of Orphans Homes it would maintain at about two hundred thousand dollars per year for each, which we believe is about the cost of our Orphan's Home.

And then think of the number of poor wretched children from the benefit to the recipients, and to the world, than such a deed? And have we not constantly before us the inestimable benefits of our Home?

Orphan's Homes have a double advantage. They eliminate the children from evil surroundings where they are liable to grow up criminals and be an expense to the tax payers, instead of which they come out respectable citizens and often become noted characters of the world. Who would not like to be instrumental in helping forward a blessed cause like

We are not speaking of the orphans of Dickens' day, where they used to farm them out to the lowest bidder and where they were often mistreated, but of the orphans of our own blessed country where they are treated like human beings, well fed and educated, as in our own Greene County Orphan's Home.

God sends children for another purpose than merely to keep up the race. He sends them to enlarge our hearts; to make us unselfish and full of kindly sympathy and affection. And We are to be God's administrators of this trust. The interests of childhood and youth is the way to make mankind worth-while. Blessed is the man that rightly directs the pathway

Don't burn good fuel in a poor stove

Its a useless waste of good fuel and a needless extravagance to try to burn it in a poor stove. It is absolutely wrong to expect good food to supply energy, vitality, health and happiness if your stomach won't absorb and assimilate it. YANKS MAKING GOOD IN FRANCE

Have Not "Americanized" Country, but Meet Success in Business.

SOME HAVE BECOME WEALTHY

Several Thousand Discharged American Soldiers Remained in France to Try Their Fortunes-Newspaper Men Land on Feet.

Paris.-Several thousand discharged American soldiers who remained in France to try their fortunes are faring as must fare all pioneers. A few have become reasonably wealthy; some are "reporting progress;" the majority, however, are flying rather life when the ice melts in the spring. lower than they were when they set out to "Americanize France."

Nearly 9,000 American expeditionary force men were released here, and it is estimated a fourth of these have settled down to work here. The others are visiting, sightseeing or have gone home after a discouraging look at business prospects.

Several hundred found employment ith large concerns, chiefly American firms preparing to do business in the devastated regions. Another group took various small places to pay their way while studying. The majority. was said, started to make good capitalizing American methods. Bu. most of them agree that easy money is not one of the natural resources of France, but a few have proved that it

is. A negro made 125,000 francs (normal value, \$25,000) buying and selling army and navy supplies a: Brest. His case is vouched for by a well-known American commercial ex-

Chicago Press Club Driver Wins. The most striking success reported is that of "the fox-trot kings of Paris." as they term themselves, Gerald Kiley, who drove the Chicago Press club ambulance, and Harold Fitch of St. Paul, who was at the wheel of one of Mrs. W. K. Vanderbilt's ambulances and later went to the front. Kiley and Fitch, the former said, got their start over here when the wife of an American banker "pressed 500 francs (about \$100) on us" when they played in a three-man jazz band at a dance she gave. They organized a Wilson welcome ball at a leading hotel when the president arrived in Paris and netted more than 10,000 francs on the affair. This success, they said, they often duplicated at "the Dixie club" dances they organized.

Knowing that good things must not be overworked, the men took over the ice cream making equipment of the Y. M. C. A., which has a capacity of a thousand gallons an hour, and late in October began wholesaling "Dixie" ice cream

Some of the most interesting of the American business experiences here are those of men who married French girls. Three of these are farming east of Paris, "making more money than they ever thought possible in the United States," their business adviser said. One man married into a dairy shop. Another returned to his trade of tailoring in the same way. Scores of American boys are in busito Sohn's Drug Store, Xenia, O., and ness with their French fathers-in-law.

Introduce Rebuilt Typewriters. Rebuilt typewriters, familiar to Americans, have been introduced to the French by Lieut. J. L. McCann of Tuscaloosa, Ala., and George E. Howard of Pasadena, Cal. Their difficulty is too much business. Isadore Court, who was a paperhanger, boldly set himself up in the decorating business in a fashionable suburb. Lieut. S. L. Tyler of Memphis, Tenn., became a merchandise broker. Harry L. Drucker, pho-

tographer, returned to his trade. One man who wanted to bring in carloads of automobiles and bicycle tires turned defeat into success by opening a tire sale and repair shop. The Maroon Athletic Club will start practice for its basketball season at the Rink Monday night.

The club membership affords opportunity for several good teams, and it is likely that two teams at least will be placed in the field. Some excellent material is expected to appear for the opening night's practice and other basketball players in the city or county who wish a try-out with the Maroons are requested to be on hand for the practice.

The teams will practice both Monday and Tuesday evenings.

Cars Collide In Traffic Saturday

A Paige touring car owned and driven by Charles Mangan of Jamestown was slightly damaged when a Ford car driven by Harvey Miller of north of this city backed into it in front of the Court House on North Detroit street at three o'clock Saturday afternoon.

Mr. Miller was backing his car from its parking space in front of the Hutchison & Gibney store and Mr. Mangan was driving north on Detroit. Both machines were slightly damaged.

Don't Let Prices Deter You!!

IT WAS thirteen years after the close of the Civil War before prices on Lumber got back to normal. History has the habit of repeating itself and present conditions would seem to justify the prediction that it is going to be fully that long or longer before lumber costs recede to the pre-war level.

DOES this mean that the price bugaboo is to hold progressive America in leash and stagnate activity over this long period along the line. stagnate activity over this long period along the line which most of all contributes to individual comfort and happiness?

OLD analysis of building material costs indicates that such, while high, logically should not deter one from carrying out any reasonable building program. Lumber as compared with 1915 has increased in cost by 84%. All off-or commodities on an average have gone up 113%. The price of farm products has increased by 116%. Realizing then in this connection that there has been a material advance in the earning power of the average individual and a tremendous advance in the price of the product of labor, it is plain that the high cost of building material, especially as applied to lumber is more of a hoax than a fact.

WITH a glorious future before us and with pressing necessity for homes and other building development all about us; with the all but absolute certainty that building costs are not going to decrease for years to come, it is the height of folly to

THE wise man will build NOW, employing extra effort and stricter economy to bridge over the present emergency. Build with a hopeful eye on the future which will bring no disappointment to those who ACT—to those who, correctly analyzing present conditions, do not allow the high price bugaboo to deter them.

DOUBLE HEADER IN FOOT BALL NOW HERE

Much comment was excited among ocal football fans this year, because Coach V. L. Faires of Central High School, on two different occasions, booked two games to be played in two

The double-header in football was at that time practically unheard of and it was the first time that the local school had played under such a school Yet a promise that the football

double-header will become popular is given by the fact that Fred W. Moore graduate manager of athletics at Harvard has arranged for at least two double headers to be played by the Crimson at the beginning of next sea-According to the Harvard manager each game will consist of four periods of eight minutes each, which will greatly reduce the playing time of the contests. Both Bowdoin and the Uni-

versity of Maine have been invited to

play Harvard in the two games of double headers. The idea, according to Mr. Moore is based on the fact that the principle value of early season games is to determine the quality of individual players and to obtain as much practice for the team as possible. The smaller college elevens usually have little practice for early games and long periods are a hardship on their men, es ially when Harvard and other large colleges are able, because of the large.

number of players, to send fresh mes into play in late periods.

The short periods are intended to save the strength of small college was and that two ames will give Harv an opportunity to try out all its pl ers, Mr. Moore said.

It was on Friday, July 17, 1776, that the motion was made that the United colonies are and ought to be free and independent. Many more occurrences could be

AMERICAN ART IS ADMIRED IN PARIS

Yankee Soldiers and Sailors Join Throngs in Luxembourg

American soldiers and sailors and workers for the Young Men's Christian association and Red Cross mingle with the crowds attending the exhibition of American paintings in the Luxembourg museum, the first of its kind to be held at Paris. While unstinted praise is being given to the many beautiful paintings, some humorous comments are to be overheard anent a few which appear strange to the novice in art.

"Wouldn't I like some pumpkin pie," said one of the boys while admiring Victor Higgins' striking picture. "The Pumpkin Girl."

One picture which draws big crowds s "The Woman in Yellow" by William MacGregor Paxton, and much admiration is accorded to John Christen Johansen's "Portrait of an Old Lady." This artist was recently in France making a study of General Joffre for the National academy. Douglas Volk has an attractive portrait picture, "Marion of Hewn Oaks," and has been engaged on a painting of King Albert of Belgium, which is intended for the National Academy of Arts.

Returning soldiers were attracted by a canvas of Gifford Beal, "The Hour of Peace," depicting decorations at Thirty-fourth street and Fifth avenue, New York. Red Cross workers admired Gardner Symons' painting, "In the Shadow of the Bridge," an exclusive study of winter sunlight on an old wooden shack and snow-covered ground, with the stone work under the bridge casting wonderful shadows on the water.

Walter MacEwen has a beautiful Pains, and Pains generally. canvas entitled "Sunday in Holland," ny in her chair, and a contrast to this is the trade mark of Bayer Manugentle scene is the late Robert Mac-Cameron's grim and realistic picture. "The Slum of London," depicting a row of men and women of the "ur derworld" drowsing on a bench a

A treat to the eye is Aston Knight's "Under the Mill," study in sunlight shadow, and "Les Pivoines" les), by Ernest T. Rosen.

LONGSHOREMEN TO

Washington, Dec. 6.—Coestwie coal shipments to New England and points on the eastern seaboard were imperilled today when it became known that the longshoremen engaged in handling coastwise traffic may go on a strike Monday. Efforts to arbitrate the differences and avert the strike are being made, in a meeting here today of the national adjustment commission, presided over by Prof. William n. Ripley, with representatives of the shipping board, the ship owners and the international longshoremen's union.

NECK, LUMBAGO

Aches and Pains of Rheumatism Sometimes Almost Unbearable.

There are weather conditions that make rheumatism worse. They are not the same in the cases of all persons. Some victims of this disease suffer more in dry warm weather than in moist cold weather, but all suffer more or less all the time.

The cause of rheumatism is an excess of uric acid in the blood, affecting the muscles and joints. Hence the blood must have attention for permanent results in the treatment of this disease.

TEN FORCEFUL FACTS CONCERNING THE Proposed Bond Issue

Greene County Memorial Hospital

DO YOU KNOW That an adequate hospital in Greene County would serve OVER 30,000 PEOPLE.

DO YOU KNOW That it will be made a SELF-SUPPORTING INSTITUTION.

That it would serve the POOR WHO ARE UNABLE TO PAY as well as the rich who can pay.

That there are people located in distant parts of this county more than THIRTY MILES AWAY FROM A MODERN HOSPITAL.

That there are times in the year it is almost impossible to travel a distance of thirty miles and, in case of serious sickness the lack of a modern institution may mean DEATH OR SERIOUS INJURY TO YOU OR A MEMBER OF YOUR FAMILY.

DO YOU KNOW

That you or some dear friend may be the next person who will need a MODERN INSTITUTION OF THIS KIND.

DO YOU KNOW

That it will enable the physicians of the county to SERVE YOU BEST WHEN YOU NEED IT MOST.

DO YOU KNOW

That if you have sickness in your family and you have a modern hospital available with a room at your disposal the burden of responsibility in CARING FOR THE SICK WOULD BE LIFTED FROM YOUR SHOULDERS.

That it would give an opportunity for Greene County women to educate themselves to be TRAINED NURSES, A PROFESSION GREATLY IN DEMAND.

That there are hundreds of dollars contributed by people in Greene County every year TO HELP MAINTAIN OUTSIDE HOSPITALS.
